

Email Design Brief

Brief para los mockups de la secuencia de lifecycle. **1 CTA por email**, north-star: terminar la primera historia y volver. Usa nuestra marca (abajo); más allá de eso, libertad de diseño.

DP

Navy #051834 canvas

Gold #fcd34d CTA

Sky #7dd3fc links

Tipografía **Nunito** (H1 weight 900, tight). Dark-first, cálido y editorial. CTA dorado con texto navy.
Brand mark + hairline gold→sky.

LA SECUENCIA

disparo por evento + ramas conductuales

- 1

Welcome

user.created · instante

activación

Subject: Welcome to Digital Polyglot 🌟 · “Welcome 🌟 — finish your first story, it’s where everything clicks.” ·

Open your first story →
- 2

Activation nudge

+24h · 1ª sin terminar

volver

Subject: Your first story takes about 4 minutes · “It clicks faster than you think.” ·

Finish your first story →

 · cover + % leído
- 3

Celebration

on story_completed (1ª)

hábito

Subject: You finished your first story 🎉 · “That’s how it works.” ·

Read your next story →

 · stat chips: words · minutes
- 4

How it works

día 3 · educativo

método

Subject: Why reading beats memorizing · “Words stick when they live in a story.” ·

Try it on a new story →

 · tip tap-a-word
- 5

Weekly recap

día 7

progreso · email visual clave

Subject: Your first week, in numbers · “Look how far you’ve come.” ·

Keep your rhythm →

 · bloque stats: stories · words · days active
- 6

Next story / identity

día 10-14

identidad

Subject: You’re becoming a reader in your new language · “A few stories down. Many to go.” ·

Choose your next story →

 · 2-3 story cards
- 7

Win-back · 3 pasos

inactivo 30-45d

re-enganche · tono humano

7a Reminder: “Your stories are still here.”

Open your library →

7b Value: “New stories since you’ve been gone.”

See what’s new →

 · showcase historias nuevas

7c Sunset: “We’ll stop here — your stories stay saved.”

Keep me in →
- HANDOFF
- Entrega: mockup por email (560px) + componentes reutilizables (header, CTA, bloque de stats, story card) con specs en hex/px. Me pasas specs + assets y lo traduzco a builders en src/lib/email.ts.
- Copy y triggers: docs/onboarding-automation-research.md · plan en /studio/onboarding
